

STONE MAINTENANCE

POLISHING POWDER

DESCRIPTION: Polishing powder is a mixture of oxide, waxes, oxalates organic, soluble in water, specially designed for the polishing treatment of marbles, agglomerates of marble chips and cement and all of the limestone.

RECOMMENDED USE:

- For interior & exterior use
- Effective for unpolished surfaces.
- For commercial use.

PROPERTIES:

The product is easy to apply and requires no special equipment, ideal restoration and repolishing also large areas, thanks to its fast reaction with the calcite contained in the supports to recover. Polishing powder is a product for professional use, particularly suitable for companies introduced in the maintenance of pavements subject to high pedestrian traffic such as hotels, halls, shopping centers, condominiums, offices, etc..

Of course, the polishing powder can be used both for the maintenance of normal re polishing, which for the restoration of those areas opacified due to contact with acidic substances or for other reasons. In this case it should be used in large doses with highly abrasive cloths (scotch / brite coarse) to mechanically remove the scars from acid and then with increasingly coarse cloth with minimal doses of polishing powder falls back ing up to the media. Polishing powder is applied to floors, walls, tables, shelves, vanity tops, kitchen tops, etc..

APPLICATION: Pour on the floor 50/100 grams of product, moisten it with water and mix until a creamy mixture, then rub the mixture slowly with a single brush with white scratch disk (Scotch / 3M brite type), from time to time add even small amount of polishing powder and water, always maintaining the same consistency of dough. The slow processing is an effective method to obtain an excellent luster. For polishing small surfaces, to reduce the amount depending on the size of the support to be polished, in this case it is possible to be done manually or with flex with adjustable rotation always of a white disk-scratch. A finished polishing, wash the surface with clean water, if necessary finish with white felt clean and dry.

ALWAYS Test small area:

Determine your desired result by testing a discreet area.

Important Safety Note

Use appropriate gloves in case of sensitive skin.

Keep product well closed and out of reach of children.

Additional information available on Material Safety Data Sheet.

STORE:

Dry surroundings above + 0°C

RECOMMENDATION:

For routine daily cleaning we recommend using "STONE CLEAN".

"CLEAN & SHINE" should be stripped off and re- applied once every 3-4 months using our wax remover STRIPPER".

Packaging:

- 1 KG

- 5 KG container

All childproof tamper evident cap
